

Single Sign On Helper

The **first** thing that might help you is refreshing the computer by pressing the power button and the refresh button at the same time.

The **third** thing is if your Chromebook still doesn't work, then you have to power off your Chromebook and restart it.

Question:
What do you do if your Chromebook is not letting you sign into single sign on?

The **second** thing you can do to sign in, is click on your picture.

The **fourth** thing is Ask Mrs. McHale.
